

## Evaluation Dutch Pro/ENGINEER Users Conference 1998

### Dutch Pro/ENGINEER Users Conference 1998

The 1998 Dutch Pro/ENGINEER Users Conference was held nov. 26th at the University in Eindhoven. A new location which was very well received. There were less visitors compared to previous year: 140 paying attendees compared to 160 in 1997 and 136 in 1996.

In the morning three Pro/AWARD Nominee presentations took place. These presentations were selected by PTC Netherlands, the User Group and last year winner out of 30 entries:

- **Bredel Hose Pumps**; hr. Jager; SPX hose pumps.
- **Fico Trim & Form**: CANCELED due to illness

- **Groenewegen Wegtransportmiddelen; Trailer**

- **Signaal**; J.Diever; MIRADOR

All had 20 minutes to present their work. The conference attendees could choose a winner, by filling in a form. The winner was announced at the end of the day.

Before these presentations (which were very well received) PTC held a presentation on the future plans of PTC.

After the lunch the conference got a more informal character with three times parallel workshops in three different conference rooms resulting in an increased mobility. The workshops were:

- Interactive Product Animator (IPA) (by Bas Verschuren from Rand Technologies).
- ModelCHECK (by Onno de Vrij from Rand Technologies).
- Pro/INTRALINK (by Roger Kabo from PTC)
- Pro/MECHANICA (by Eric Haenen from HEC).
- Pro/TOOLKIT (by Ronald de Leeuw from PTC).
- Repairing imported geometry (by Ron Gestel from PTC).
- Top-Down Design (by Piet van Dongen from PTC).

During the breaks in between the workshops people had the opportunity to attend to the various vendor presentations:

- [CE Masters](#)
- [Detron Consulting Engineers](#)
- [Digital Computers](#)
- [First Design](#)
- [Inventologies](#)
- [Intergraph Computer Systems](#)
- [Materialise](#)
- [Rand Technologies](#)
- [Silicon Graphics](#)
- [Spekan Engineering](#)
- [Total Support](#)
- [Venture Rapid Technologies](#)

Furthermore they could take a look at some High Mountain Press material and off course meet many other Pro/E Users and the PTC Representatives.

After the workshops everyone went to the main conference room to prepare for the announcement of the Pro/AWARD winner:

- [Rand Technologies gave away a Spaceball](#)
- [All Pro/AWARD Nominees received an Compaq Organizer](#)

Now it was time to announce the 1998 Dutch Pro/AWARD Winner chosen by the conference attendees themselves ... and the winner is:

**Groenewegen Wegtransportmiddelen**  
with their trailer.

They explained how they use Pro/ENGINEER to automatically build a complete set of drawings for a truck trailer (800 parts) all based on one generic assembly.

Layouts, Pro/PROGRAM, Interchange assemblies and Simplified reps were the keywords here.

They received 1000 guilders and the Dutch Pro/AWARD from PTC.

Congratulations!

The day ended with an informal drink.

**These are the (dutch) results from the evaluation forms:**

Aantal deelnemers: ca 140

Aantal ingeleverde formulieren: 126 stuks.
